CAREER OVERVIEW

Web Developer with experience using **Rails**, CakePHP, and **iOS**. Develops software for desktop and mobile web as well as native mobile applications using the following technologies on top of worry free unit and integrations tests; Objective-C, and iOS Cocoa framework, Ruby, Rails framework, JavaScript, and Sass.

Experience ranges within a variety areas in the rails framework from 3.1 to 4.2, 1.8.3 to 2.2.0, automated testing with minitest, rspec, fixtures and factories. Deployed with heroku and capistrano. Worked with mysql as well as postgresql. Uses git as his automated testing suite with his own .git_profile and .bash_profile to speed up his development process.

EXPERIENCE

FINE Design Group
Rails Developer - Portland, OR
- Streamlined 3 separate tasks into modularized processes/gems in order to develop at 10x
- Helped build Rails Engine as a gem that streamlined our process for building CMS's
- Built back-end for www.sevenfallscellars.com
- Added automated test suite to Rails 3.2 legacy ecommerce app
- Took over majority of bug fixes and feature updates for long standing client with 30+ apps
- Involved in weekly standups with an **agile** project management process
- Deployed apps with **capistrano** and **environment branching** techniques
- Worked on legacy apps using other languages like PHP, cakePHP, and wordpress

EDUCATION AND TRAINING

2013 Code Fellows iOS
Completed an 8 week long intense introduction to iOS course. I learned Objective-C and submitted an app to the app store in just 4 weeks.
- submitted iOS7 app called "fridgit" to app store that allowed user to input food items and and expiration date. Information was stored on a Heroku hosted rails back end that the user would PUT and GET JSON from.
- Gained experience learning about and building apps using the following apple frameworks and Tools: CoreData, AVFoundation, SpriteKit, MapKit, Multipeer Connectivity, Social, and pre-ARC memory management.
- worked with a team taking an idea and collaborating together to make an app with an agile development process

2013 Self Studying
Well versed with the art of reading documentation, Stack Overflow, and google searches. Has about 2 years of experience comprised of reading technical books and implementing those skills. I also used codecademy.com, codeschool.com, lynda.com, as well as various other videos on the Internet. Built responsive javascript quiz app and hosted it at **http://dannysperry.github.io**.
